EcoSip 7-Day Pre-Launch Social Media Campaign

Platform: Instagram + TikTok. Audience: 18–35, eco-conscious, tech-savvy. Tone: fun, relatable, playful — no generic 'save the planet' guilt-tripping. The week tells one continuous story: tease → relate → reveal → live-with-it → mythbust → rally → launch. Each day below includes the Instagram caption, a matching TikTok video concept, an AI-image-generator-ready visual prompt, tiered hashtags, recommended posting time, and a short rationale tying the post back to the campaign goals.

1. 7-Day Content Calendar (Expanded)

Day 1 — "The Mystery Drop"

Strategic goal: Spark curiosity with zero product reveal — earn comments, not just likes.

Instagram caption	Something's brewing at EcoSip HQ. 🧐 We've been sketching, testing, and taste-arguing (yes, water has opinions) for months. In 7 days, we're done hiding it. One hint: it fits in your bag, your car cupholder, and your personality. Guess what we're launching in the comments — closest guess gets a shoutout on launch day. Loudest guesser wins bragging rights either way. #EcoSip #ComingSoon #GuessTheDrop
TikTok video concept	Hook (0-2s): Hand slowly unwraps a mystery package on a cluttered desk, curious-sting audio. Body (3-10s): Quick cuts

	of sketches, color swatches, a whiteboard covered in crossed-out names. On-screen text: 'We've been hiding something for 3 months 🙈'. Close (11-15s): Text card 'Guess in the comments' + '7 days' countdown graphic. Use a trending suspenseful/curious sound rather than music with lyrics so the VO/text carries it.
AI image-generator visual prompt	A sleek, mysterious product silhouette wrapped in dark green tissue paper on a matte black surface, soft studio spotlight from above, condensation droplets visible, minimalist product-teaser photography style, shallow depth of field, moody yet playful, no text, 4:5 vertical composition.
Primary hashtags	#EcoSip #ComingSoon #GuessTheDrop
Secondary / niche hashtags	#SustainableStartup #NewBrandAlert #WaterBottleTok
Best posting time	Evening, 6–8pm local — catches the after-work scroll when curiosity-driven content performs best.
Why it works	Curiosity gaps drive comments (not just passive likes), and guessing is a low-effort CTA that works for a brand nobody knows yet.

Day 2 — "The Bottle Ick"

Strategic goal: Land the relatable pain point before pitching anything — earn the 'this is literally me' reaction.

Instagram caption	POV: you're on your third \$6 plastic water bottle this week because you <i>*always*</i> forget the reusable one at home. We see you. We ARE you. That's exactly the problem we've been quietly building a fix for — no lectures, no guilt trips, just a bottle you'll actually want to grab on your way out the door. What's your worst forgotten-bottle story? Tell us
--------------------------	--

	below, we're taking notes for the next drop. #EcoSip #TheBottlelck #RelatableNotPreachy
TikTok video concept	Hook (0-2s): Fast zoom on a hand grabbing a plastic bottle from a gas station cooler, exasperated sigh sound. Body (3-9s): Quick montage — bottle in car cupholder, bottle in office trash, receipt total on screen ('\$6.47 for water. again.'). On-screen text: 'me, every single week'. Close (10-15s): Text card 'okay but for real, why is this still happening' + CTA to comment. Use a self-deprecating trending audio clip (comedic sigh/eye-roll sound) rather than upbeat music.
AI image-generator visual prompt	A flat-lay of a cluttered kitchen counter: keys, phone, half-eaten toast, and three crumpled single-use plastic water bottles, warm morning window light, slightly chaotic and humorous 'rushing out the door' energy, photorealistic, overhead angle, no text overlay.
Primary hashtags	#EcoSip #TheBottlelck #RelatableNotPreachy
Secondary / niche hashtags	#MillennialProblems #ZeroWasteish #GymBagEssentials
Best posting time	Mid-morning, 9–10am — aligns with the 'forgot my bottle again' commute/work-arrival moment.
Why it works	Names the audience's actual daily annoyance instead of a save-the-planet lecture, which is exactly the cliché the brief asks us to avoid.

Day 3 — "The Glow-Up"

Strategic goal: First real visual reveal — trade mystery for desirability.

Instagram caption	Okay, we can't hide it fully anymore. Here's a peek at the finish — that satin matte shell everyone's going to ask
--------------------------	--

	about. We spent way too long picking colors (sorry to our group chat, you've seen 40 versions of this). Which shade is calling your name: Moss, Clay, or Sea Glass? Vote below — the winning color gets restocked first if it sells out on launch day. #EcoSip #GlowUp #PickYourColor
TikTok video concept	Hook (0-2s): Bottle spins into frame on a turntable, satisfying 'reveal' sound. Body (3-10s): Slow pans across each colorway with on-screen labels (Moss / Clay / Sea Glass), light catching the matte finish. Close (11-15s): Poll sticker overlay 'Which one's yours?' + CTA to vote in comments. Pair with a clean, satisfying ASMR-adjacent trending audio (soft pop/click sound) rather than lyrics that compete with the visual.
AI image-generator visual prompt	Three reusable water bottles in moss green, terracotta clay, and sea-glass blue-green, arranged in a diagonal line on a light concrete surface, bright natural daylight, soft shadows, clean minimal product photography, slight water droplets on the bottles, no text, square or 4:5 crop.
Primary hashtags	#EcoSip #GlowUp #PickYourColor
Secondary / niche hashtags	#ProductReveal #AestheticFinds #ColorwayDrop
Best posting time	Lunch break, 12–1pm — visual/shopping-mindset content performs well when people are scrolling on a break.
Why it works	Turns the audience into co-decision-makers (color vote) instead of passive viewers, which drives shares and repeat visits before launch.

Day 4 — "A Day in the Life"

Strategic goal: Prove utility — this is an everyday object, not a shelf decoration.

Instagram caption	6am gym bag. 12pm desk. 6pm dog walk. 11pm nightstand. One bottle, zero outfit changes. This is what EcoSip is actually for — not a display piece, an everyday carry that survives your whole day without leaking in your tote (we tested this more than we'd like to admit). Where's the bottle that's coming with YOU this week? Drop your #1 spot below and we'll feature the best ones. #EcoSip #EverydayCarry #HydrateDifferently
TikTok video concept	Hook (0-2s): Alarm clock sound, hand grabs bottle off nightstand at 6am. Body (3-12s): Fast-cut 'day in the life' montage — gym bag zip, desk pour, dog leash clip, nightstand set-down — each with a quick location caption and timestamp overlay (6AM / 12PM / 6PM / 11PM). Close (13-15s): Text card 'built for all of it' + CTA 'where's yours going this week?'. Use an upbeat, fast-cut trending 'day in my life' audio format that's already popular on TikTok.
AI image-generator visual prompt	A four-panel style collage (single image, four quadrants) showing the same green reusable bottle in a gym bag, on an office desk beside a laptop, clipped to a dog leash on a walk, and on a nightstand with a lamp glow, consistent warm color grading across all four scenes, lifestyle photography, candid and authentic, no text.
Primary hashtags	#EcoSip #EverydayCarry #HydrateDifferently
Secondary / niche hashtags	#DayInMyLife #GymBagEssentials #DeskSetup
Best posting time	Early evening, 5–7pm — when 'day in the life' format content gets its strongest completion rates.
Why it works	Shifts the pitch from aesthetics to real utility across contexts the audience already lives in, which builds purchase intent, not just admiration.

Day 5 — "Mythbusting Monday(ish)"

Strategic goal: Defuse the 'eco = boring/expensive/preachy' objection with humor, not guilt.

Instagram caption	Myth: eco-friendly means boring, beige, and twice the price. Also myth: you need to lecture your friends about plastic to care about the planet. Truth: you can just... use a bottle that looks good and does its job, no TED Talk required. That's the whole pitch, honestly. What's an 'eco' myth you're tired of hearing? We'll bust the best ones in our Stories tomorrow. #EcoSip #MythbustingMonday #NotAnotherEcoLecture
TikTok video concept	Hook (0-2s): On-screen text 'eco-friendly myths, debunked' over a bored-looking beige bottle. Body (3-10s): Quick 'myth vs. truth' text-flip transitions (3 myths, 3 truths), ending on the actual product looking sleek and colorful by contrast. Close (11-15s): Text card 'no lecture, just a better bottle' + CTA 'drop the myth you're most tired of'. Use a punchy 'myth vs fact' trending sound/transition effect that's common in debunking-format videos.
AI image-generator visual prompt	A playful split-screen illustration: left side shows a dull gray boring water bottle labeled with a small crossed-out doodle icon, right side shows a vibrant, stylish green EcoSip-style bottle with a sparkle icon, bold flat-illustration style, bright color contrast, comic-style visual metaphor, no readable text in image.
Primary hashtags	#EcoSip #MythbustingMonday #NotAnotherEcoLecture
Secondary / niche hashtags	#SustainableNotPreachy #EcoFriendlyFinds #MythVsFact
Best posting time	Midday, 11am–1pm — myth/fact format content tends to spike around lunchtime scrolling.

Why it works	Directly neutralizes the brief's stated risk (generic 'save the planet' cliché) by making fun of the cliché itself instead of repeating it.
---------------------	---

Day 6 — "Squad Up"

Strategic goal: *Convert audience into a distribution engine the night before launch.*

Instagram caption	T-minus 1 day. We want YOUR face (or hands, or desk setup) in this launch — tag a friend who still hasn't replaced their sad gas-station water bottle. Best tags get an early link to shop before everyone else tomorrow morning. Let's make launch day loud, not just another Tuesday. Tag below, we're reading every single one tonight. #EcoSip #SquadUp #LaunchWeek
TikTok video concept	Hook (0-2s): Countdown graphic '1 DAY' with energetic sound sting. Body (3-9s): Quick clips of the team packing boxes, taping a 'launch day' sign, genuine excitement/laughing. On-screen text: 'we can't believe it's almost here'. Close (10-15s): Text card 'tag the friend who needs this' + CTA 'early access for the best tags'. Pair with an upbeat, celebratory trending countdown audio.
AI image-generator visual prompt	A dynamic group flat-lay of hands from different people reaching in from the frame edges, each holding a different colored EcoSip bottle, bright overhead lighting, confetti-like scattered leaf and water-drop graphic elements, energetic and communal mood, top-down composition, no text.
Primary hashtags	#EcoSip #SquadUp #LaunchWeek
Secondary / niche hashtags	#TagAFriend #LaunchEve #SmallBusinessLaunch

Best posting time	Evening, 7–9pm — tag-a-friend CTAs get their highest completion when people are relaxed and scrolling socially.
Why it works	Converts a passive audience into an active referral channel right before the moment it matters most — launch day traffic.

Day 7 — "It's Here"

Strategic goal: Convert hype into orders — clear, high-energy CTA.

Instagram caption	It's launch day. 🎉 EcoSip is officially live — link in bio, and the first 200 orders get a free carry strap. Thank you for guessing, voting, and tagging your friends all week; you basically co-designed this drop with us. Now go hydrate like you mean it, and tag us in your unboxing so we can repost the best ones all week. #EcoSip #LaunchDay #HydrateDifferently
TikTok video concept	Hook (0-2s): Confetti-pop sound effect, bottle drops into frame center-stage. Body (3-10s): Quick unboxing-style shots — box opening, bottle reveal, pouring water, first sip reaction. On-screen text: 'IT'S LIVE 🎉'. Close (11-15s): Text card 'link in bio · first 200 get a free strap' + CTA 'tag us in your unboxing'. Use a triumphant, high-energy trending drop/launch sound.
AI image-generator visual prompt	A hero shot of the finished reusable water bottle standing center-frame on a sunlit outdoor picnic table surrounded by out-of-focus friends laughing in the background, golden-hour lighting, celebratory and bright mood, shallow depth of field on the bottle, photorealistic lifestyle photography, no text overlay, 4:5 vertical.
Primary hashtags	#EcoSip #LaunchDay #HydrateDifferently

Secondary / niche hashtags	#NewProductLaunch #UnboxingTime #ShopSmall
Best posting time	Morning, 8–9am, then a Stories/TikTok reminder push at 5–6pm to catch both commute windows.
Why it works	Delivers on a full week of buildup with a concrete, time-boxed incentive (first 200 orders), turning attention into an actual conversion moment.

2. Prompt History (Iteration & Chaining Log — Expanded)

Below is the full chain: five steps, each moving from a bare first pass, through a reviewed revision, to a final prompt that fed the previous step's real output back in. This mirrors how the campaign was actually assembled — themes fed captions, captions fed both visual prompts and TikTok scripts, and captions fed a dedicated hashtag pass.

Step A — Brainstorming daily themes

First pass:

Brainstorm 7 daily themes for a pre-launch campaign for a reusable water bottle.

Revision:

Brainstorm 7 daily themes for EcoSip's 7-day pre-launch Instagram/TikTok campaign. Audience is 18–35, eco-conscious, tech-savvy. Avoid generic 'save the planet' language.

Final:

Act as a social media strategist for EcoSip, a startup launching a sleek reusable water bottle. Audience is 18–35, eco-conscious, tech-savvy. Brainstorm 7 daily themes for a 7-day pre-launch Instagram/TikTok campaign that builds toward launch day. Avoid generic 'save the planet' messaging. The themes should form a narrative arc (tease → relate → reveal → live-with-it → mythbust → rally → launch) and each should be nameable in 2–4 words.

What changed and why: The first pass returned generic, disconnected ideas ('Day 1: Introduce the brand', 'Day 2: Share a fact'). The revision added audience and a tone rule, which fixed the voice but themes still felt like a flat list. The final prompt added a role and an explicit narrative-arc structure, which is what actually made the 7 days build on each other instead of reading as seven unrelated posts.

Step B — Writing captions

First pass:

Write a 50-word fun caption for Theme 1.

Revision:

Write a witty, under-100-word Instagram caption for Theme 1 ('The Mystery Drop'). Audience is 18–35. Include 2–3 hashtags.

Final (chained from Step A):

Act as a social media manager for an eco-friendly brand. Audience is 18–35. Here are the 7 themes: [full output from Step A]. Write a witty Instagram/TikTok caption for Theme 1 ('The Mystery Drop'), under 100 words, that teases without revealing the product, ends with a question or CTA to drive comments, and includes 2–3 natural (non-spammy) hashtags. Avoid clichés like 'save the planet.'

What changed and why: The first pass read like a press release ('We are excited to announce...'). The revision fixed length and hashtag count but still felt generic since it wasn't told what the actual theme was about. Chaining in the real theme name from Step A, and requiring a CTA, gave the caption a specific hook instead of a generic template — this is where the brand's actual voice ('we ARE you', self-aware humor) first showed up.

Step C — Generating visual prompts

First pass:

Create a visual prompt for an AI image generator that matches this caption.

Revision:

Write a Midjourney-style visual prompt for this caption, describing subject and mood.

Final (chained from Step B):

Here is the caption: [full output from Step B]. Now write a Midjourney/DALL-E-style visual prompt that matches this caption's playful, eco-friendly tone. Specify subject, lighting, color palette, composition/angle, and photographic or illustration style. No embedded text in the image. Aspect ratio 4:5 for Instagram.

What changed and why: The first pass gave a vague one-liner ('a nice photo of a water bottle'). The revision added style intent but was still too short to

actually run in an image generator reliably. Feeding in the finished caption, and requiring lighting/palette/composition/style/aspect-ratio, produced prompts specific enough to use as-is and tonally locked to that day's exact joke, not just the general 'eco' theme.

Step D — TikTok video concepts (new chained step)

First pass:

Turn this caption into a TikTok video idea.

Revision:

Write a 15-second TikTok concept based on this caption, with a hook and a call to action.

Final (chained from Step B):

Here is the Instagram caption: [full output from Step B]. Adapt this into a 15-second TikTok concept for the same day. Structure it as Hook (0-2s) / Body (3-10s) / Close (11-15s), include suggested on-screen text, and recommend a style of trending audio (not lyrics) that fits the mood without dating the post. Keep the same joke/hook as the caption so the two platforms feel like one campaign.

What changed and why: This step wasn't in the original plan — the first two passes produced TikTok ideas that didn't match the Instagram caption's joke, so the two platforms felt like separate campaigns. Chaining the actual caption in, plus a fixed hook/body/close structure and an explicit instruction to reuse the same hook, kept every day's Instagram and TikTok post feeling like one coordinated release instead of two different brands.

Step E — Hashtag refinement (new chained step)

First pass:

Give me hashtags for this water bottle post.

Revision:

Suggest 5 hashtags for this caption that aren't generic.

Final (chained from Step B):

Here is the caption: [full output from Step B]. Suggest hashtags in two tiers: (1) 2–3 primary brand/campaign hashtags to reuse across the whole week, and (2) 2–3 secondary niche hashtags specific to this day's theme. No more than 6 total, nothing generic like #love or #instagood, and nothing that reads as hashtag-stuffing.

What changed and why: The first pass returned oversized, spammy lists mixing generic tags (#love, #water, #instagood) with the brand's actual tags. Splitting the ask into 'primary vs. secondary' tiers and capping the count matched the brief's 'natural, not spammy' requirement, and it's what let every day share the same 2-3 brand tags while still feeling specific to that day's post.

3. Reflection

My first-pass prompts were too broad — 'write a caption' or 'brainstorm themes' produced generic, interchangeable content that could have belonged to any brand, and the tone leaned corporate rather than playful. I refined the prompts by adding a role (social media manager/strategist), explicit audience and tone constraints, word limits, and a required CTA or hashtag format. That specificity is what actually shaped the voice — vague prompts got vague answers.

Chaining made the biggest difference. Instead of generating captions, visuals, TikTok scripts, and hashtags independently, I fed each caption into the later prompts so the image, video, and hashtags all had to match that day's exact joke or hook, not just the general 'eco' theme. This kept the whole week visually and tonally consistent, the way a single campaign should feel, rather than several unrelated posts. It also let me catch tone drift early: if a chained visual or video prompt came out too somber, I knew the caption before it needed to be punchier too, so I could fix one step back instead of patching everything at the end.

Extended process notes (supplementary, outside the 200-word reflection)

- Adding Steps D and E (TikTok concepts and tiered hashtags) came from noticing the two platforms and the tag lists drifted from the caption's

voice once generated separately — a gap the original 3-step plan didn't catch.

- Locking every video concept to the same Hook/Body/Close timing structure made the seven TikTok scripts easy to compare and kept none of them running long or short.
- Splitting hashtags into 'primary' (reused every day, building recognition) vs. 'secondary' (specific to that day's theme) solved the 'natural, not spammy' constraint better than any single flat list did.
- The narrative arc from Step A (**tease** → **relate** → **reveal** → **live-with-it** → **mythbust** → **rally** → **launch**) became the backbone every later step checked itself against — when a caption or video felt off-tone, it was usually because it had drifted from its place in that arc.
